

Title: Information display arrangement
Applicant and inventor: Shahara KHALEQUE
International Application # PCT/GB2004/001930
International filing date May 5, 2004

**Summaries of Non-English References Listed in
Applicant's Information Disclosure Statement**

DE20008901U1

Self-adhesive transparent pocket for visiting cards, price tags and notices.

The transparent pocket is self-adhesive and has rigid plastic sides joined by welded seams along two or three sides, with or without a finger cutaway. The pocket is the size of a visiting card or a cheque card.

FR2622851A1

Pouch for holding parking tickets and insurance certificates.

A device is designed to make it possible to hold, flattened against the inside surface of a motor vehicle windscreen, a parking ticket and insurance certificate so that they can be viewed easily from outside the vehicle. The device comprises a transparent pouch having a compartment 1 which receives the parking ticket 9, a compartment 2 which receives the insurance certificate 11 and an advertising space 10. Cutaways 6 facilitate the gripping of the documents and in addition the wall 4, which is not as high as the wall 3 in Figure 2, simplifies insertion of the documents into the compartments. The device can be stuck to the windscreen by adhesive or other means.

FR2602727A1

Vignette holder for automobile.

A device makes it possible to group together and display at the same location the obligatory vignettes (tax discs, insurance certificates and passes) which are to be fixed onto the windscreen of each motor vehicle. It is composed of a self-adhesive transparent plastic sheath comprising two pouches joined together or one double pouch, provided with at least one opening for slipping the vignettes therein, and whose opaque or transparent back side may receive an informative or advertising text or picture.

FR2762302A1

Assembly of adhesive pockets.

Adhesive rectangular pockets (11) formed by a transparent plastics upper sheet (12) and a lower sheet (13) carrying an adhesive coating (18) are assembled on continuous roll (21). When in the roll (21), the adhesive coating (18) of the lower sheets (13) is in contact with the upper sheets, the upper faces of which carry an anti-adhesive coating (19). Successive pockets in the roll are connected by a transverse rupture zone (15) enabling their easy separation after unwinding from the roll (21).
